## INTRODUCTION

This document provides guidance to all Families, Early Years Practitioners and Health and Social Care Professionals. To support planning and decision-making for children with Special Educational Needs and Disability (SEND) In developing this guidance consideration has been given to the principles and processes outlined in the following key documents:

### Key References

#### 1. The Early Years Foundation Stage: *Statutory Framework for the Early Years Foundation Stage: Setting the standards for learning, development and care for children from birth to five. (EYFS)*

The Early Years Foundation Stage seeks to provide:

- **Quality and consistency** in all Early Years settings, so that every child makes good progress and no child is left behind.
- **A secure foundation** through learning and development opportunities which are planned around the needs and interests of each individual child and are assessed and reviewed regularly;
- **Partnership working** between practitioners and with parents and/or carers;
- **Equality of opportunity** and anti-discriminatory practice, ensuring that every child is included and supported.

(Introduction – 3)

### Overarching Principles

Four guiding principles should shape practice in Early Years settings. These are:

- Every child is a **unique child**, who is constantly learning and can be resilient, capable, confident and self-assured;
- Children learn to be strong and independent through **positive relationships**;
- Children learn and develop well in **enabling environments**, in which their experiences respond to their individual needs and there is a strong partnership between practitioners and parents and/or carers; and
- **Children develop and learn in different ways and at different rates.** The framework covers the education and care of all children in Early Years provision, including children with special educational needs and disabilities.

(Introduction – 6)

A quality learning experience for children requires a quality workforce. Well-qualified, skilled staff strongly increases the potential of any individual setting to deliver the best possible outcomes for children. (EYFS 1:11)

Most children will develop and make progress that is typical for their age. Early Years practitioners provide appropriate support through daily activities that promote and support children's development and learning. The Early Years Foundation Stage requires Early Years practitioners to identify the need for additional support as early as possible.

## 2. Special Educational Needs and Disability Code of Practice: 0 - 25 years - 2014 (SEND Code of Practice)

Providers of Early Years education, that is all Early Years providers in the maintained, private, voluntary and independent sectors that a local authority funds, are required to have regard to this Code including the principles set out in Chapter 1. (5.2)

The Early Years Foundation Stage (EYFS) is the statutory framework for children aged 0 to 5 years. All Early Years providers must follow the safeguarding and welfare requirements of the EYFS and the learning and development requirements, unless an exemption from these has been granted. (5.3)

Providers **must** have arrangements in place to support children with SEN or disabilities. These arrangements should include a clear approach to identifying and responding to SEN. The benefits of early identification are widely recognized – identifying need at the earliest point, and then making effective provision, improves long-term outcomes for children. (5.4)

All those who work with young children should be alert to emerging difficulties and respond early. In particular, parents know their children best and it is important that all practitioners listen and understand when parents express concerns about their child's development. They should also listen to and address any concerns raised by children themselves. (5.5)

All Early Years providers are required to have arrangements in place to identify and support children with SEN or disabilities and to promote equality of opportunity for children in their care. These

requirements are set out in the EYFS framework. The EYFS framework also requires practitioners to review children's progress and share a summary with parents. (5.12)

The EYFS framework requires Early Years providers to have arrangements in place for meeting children's SEN. Those in group provision are expected to identify a person to act as Special Education Needs Co-ordinator (SENCo) (5.53)

A maintained nursery must ensure that there is a qualified teacher designated as the SENCo (5.52)

### 3. Early Support

The SEND Code of Practice advises that: 'Early Support, supports the better delivery and co-ordination of services for disabled children, and their families, including training for professional or trained independent volunteers providing a single point of contact or key working' (5.17)

*Early Support is a way of working, underpinned by **10 principles** that aim to improve the delivery of services for disabled children, young people and their families. It enables services to coordinate their activity better and provide families with a single point of contact and continuity through key working. Early Support ensures that service delivery is child, young person and family centered. It focuses on enabling services and practitioners to work in partnership with children, young people and their families.*  
[www.councilfordisabledchildren.org.uk](http://www.councilfordisabledchildren.org.uk)

### 4. Early Help Assessment (EHA)

The SEND Code of Practice advises that: 'A delay in learning and development in the early years may or may not indicate that a child has SEN, that is, that they have a learning difficulty or disability that calls for special educational provision. Equally, difficult or withdrawn behaviour does not necessarily mean that a child has SEN. However, where there are concerns, there should be an assessment to determine whether there are any causal factors such as an underlying learning or communication difficulty. If it is thought housing, family or other domestic circumstances may be contributing to the presenting behaviour, a multi-agency approach, supported by the use of approaches such as the Early Help Assessment, should be adopted' (5.29)

The Early Help Assessment (EHA) is a standardized approach to assessing children and young people's needs and deciding how they should be met. Central Bedfordshire Council states that '*the EHA is a key element of our strategy to delivering more effective early intervention and prevention and is a tool for the identification and initial assessment of children and young people considered to be in need of additional support*'.

Once completed the EHA will serve as a useful way to share information and to track and review a child or young person's progress. At the point an EHA is completed by a practitioner they are also encouraged to consider and identify any future likely or predictable difficulties a child may face.

The EHA form should be used by practitioners in all agencies who work with unborn babies, babies, children, young people and their families and have been trained in its use.

[www.centralbedfordshire.gov.uk/school/professionals/information-practitioners/eha-forms.aspx](http://www.centralbedfordshire.gov.uk/school/professionals/information-practitioners/eha-forms.aspx)

### 5. Medical Conditions

All Early Years providers should take steps to ensure that children with medical conditions get the support required to meet those needs. This is set out in the EYFS framework (5.11)

A medical diagnosis or a disability does not necessarily imply SEND. It may not be necessary for a child or young person with any particular diagnosis or medical condition to need any form of additional educational provision at any phase of education. It is the child's **educational needs** rather than a medical diagnosis that must be considered. Some children may not require school based SEND provision or Education, Health and Care plans but may have medical conditions that, if not properly managed, could hinder their access to education.

### 6. Partnership with Parents

The SEND Code of Practice recognises that: 'Parents' early observations of their child are crucial' and that: 'Where a setting identifies a child as having SEN they **must** work in partnership with parents to establish the support the child needs' (5.37)

Part 3 of the Children and Families Act 2014: local authorities must have regard to the importance of providing children and their parents and young people

with the information and support necessary to participate in decisions. (2.1)

The Central Bedfordshire Local Offer website <http://www.centralbedfordshire.gov.uk/children/sen-disability/landing.aspx> provides links to a range of services designed to inform and support children, young people and families in making choices and decisions regarding their individual needs.

NB: Parents should be taken to include all those with parental responsibility including carers and corporate parents, where not specifically stated.

### **The Structure of the Guidance**

This guidance is divided into the four broad areas of need as described in the SEND Code of Practice. 2014

- Communication and interaction
- Cognition and learning
- Social, emotional and mental health difficulties
- Sensory and/ or physical needs

The Code of Practice also advises Early Years practitioners to be aware that a child may have difficulties in more than one of the areas of need and that a child's needs may change over time.

In each of the four areas of need there are:

- Indicators relating to the provision characteristics – that is the actions that settings should be taking at Stage 1 and Stage 2.

- Indicators relating to children's characteristics at Stage 1 / Stage 2 and an additional level of indicators which might trigger a request for a needs assessment for an Education, Health and Care plan.

Early Years providers should assess children's progress in accordance with the seven areas of development and learning set out on the EYFS. Early Years practitioners will be familiar with the Early Years Outcomes document which is a non-statutory guide to help and inform understanding of children's development. It is widely used as a guide to making best fit judgements about whether a child is showing typical development for their age. These outcomes together with professionals' advice have been used where appropriate to describe/indicate the level of SEND support appropriate to meet the needs of the child.

### **Identifying SEN**

The SEND Code of Practice 2014 advises that: 'In addition to the formal checks, Early Years practitioners working with children should monitor and review the progress and development of all children throughout the early years' (5.27)

'Where a child appears to be behind expected levels, or where a child's progress gives cause for concern, practitioners should consider all the information about the child's learning and development from within and beyond the setting, from formal checks, from practitioner observations and from any more detailed assessment of the child's needs. From within the setting practitioners should particularly consider

information on a child's progress in communication and language, physical development and personal, social and emotional development. Where any specialist advice has been sought from beyond the setting, this should also inform decisions about whether or not a child has SEN. All the information should be brought together with the observations of parents and considered with them' (5.28)

When deciding on a child's primary area of need, a good starting point are the statements that describe children's characteristics within 'Cognition and Learning'. Based on how these match a child's needs, the other sections of the Guidance should then be consulted.

The children's characteristics should be read with the following in mind:

- Age of the child and stage of development plus experience;
- How recently he or she started at the setting;
- The behaviour and skills of the majority of his/her peers;
- Family background/history.

However, this should not preclude the possibility of a young child who has recently joined a setting being identified with additional needs that require immediate support at whatever level is appropriate.

When reading the characteristics, it should be borne in mind that children may show some or all of the difficulties stated at each level of need. Difficulties at each level of need are expected to be in addition to those at a less severe level.

## SEND Support

'Where a setting makes special educational provision for a child with SEN they should inform the parents and a maintained nursery school **must** inform the parents. All settings should adopt a graduated approach with four stages of action: **assess, plan, do and review**' (5.38)

Decisions about a child's level of need should be part of a continuous and systematic cycle of **Assess, Plan, Do, and Review** within the setting, to help all children to develop, learn and progress. The range, type and intensity of interventions should not be seen as a fixed state but should be changed according to the progress the child makes over time.

**N.B.** Schools in Central Bedfordshire expressed a wish to retain a graduated approach to meeting special educational needs. There are 2 stages of SEN support:

At **Stage 1** some additional or different action within the setting will be required to enable the child to access independent learning and the curriculum.

**Stage 2** builds on the arrangements for Stage 1 to enable settings to match provision to meet children's needs. At this point settings should be consulting outside agencies to support their own interventions with children. Settings must seek parents' written consent before consulting any outside agency and tell them in advance when a professional is visiting the setting. They must always share with parents/carers reports produced by professionals. In many instances the professionals will themselves meet with parents/carers.

Stage 1 and Stage 2 provision that settings are advised to adopt are described under the following strands of action: -

- Parent/carers and child's participation
- Assess, plan, do and review
- Quality learning experiences
- Additional human and other resources
- Supporting development and learning
- Training and Advice

### Assess

In identifying a child as needing SEN support, the Early Years practitioner, working with the setting SENCo and the child's parents, will have carried out an analysis of the child's needs. This initial assessment should be reviewed regularly to ensure that support is matched to need. Where there is little or no improvement in the child's progress, more specialist assessment may be called for from specialist teachers or from health, social services or other agencies beyond the setting. Where professionals are not already working with the setting, the SENCo should contact them, with the parents' agreement. (5.39)

### Plan

Where it is decided to provide SEN support, and having formally notified the parents (see 5.38) the practitioner and the SENCo should agree, in consultation with the parent, the outcomes they are seeking, the interventions and support to be put in place, the expected impact on progress, development or behaviour, and a clear date for review. Plans should take into account the views of the child. The

support and intervention provided should be selected to meet the outcomes identified for the child, based on reliable evidence of effectiveness, and provided by practitioners with relevant skills and knowledge. Any related staff development needs should be identified and addressed. (5.40).

Parents should be involved in planning support and, where appropriate, in reinforcing the provision or contributing to progress at home. (5.41)

### Do

The Early Years practitioner, usually the child's key person, remains responsible for working with the child on a daily basis. With support from the SENCO, they should oversee the implementation of the interventions or programmes agreed as part of SEN support. The SENCO should support the practitioner in assessing the child's response to the action taken, in problem solving and advising on the effective implementation of support. (5.42)

### Review

The effectiveness of the support and its impact on the child's progress should be reviewed in line with the agreed date. The impact and quality of the support should be evaluated by the practitioner and the SENCO working with the child's parents and taking into account the child's views. They should agree any changes to the outcomes and support for the child in light of the child's progress and development. Parents should have clear information about the impact of the support provided and be involved in planning next steps. (5.43)

This cycle of 'Assess, Plan, Do, Review' should be revisited in increasing detail and with increasing frequency, to identify the best way of securing good progress. At each stage parents should be engaged with the setting, contributing their insights to assessment and planning. Intended outcomes should be shared with parents and reviewed with them, along with action taken by the setting, at agreed times. (5.44)

### Recording SEND Support

All settings are required to record the amount and type of SEND Support a child receives.

The SEND Code of practice states: Practitioners **must** maintain a record of children under their care as required by the EYFS framework. Such records about their children **must** be available to parents and they **must** include how the setting supports children with SEN and disabilities. (5.50)

To enable schools and settings to record the actions and steps taken to provide SEND Support for individual children Central Bedfordshire use a SEND Support Plan – One planning for Education, Health and Care. A copy of the SEND Support Plan can be downloaded at <http://www.centralbedfordshire.gov.uk/children/send-disability/local-offer/overview.aspx>

### Education, Health and Care (EHC) Needs Assessment

The Code of Practice advises that: 'Where, despite the setting having taken relevant and purposeful action to identify, assess and meet the special educational needs of the child, the child has not made expected progress, the setting should consider requesting an Education,

#### Health and Care needs assessment' (5.49)

The special educational needs of the great majority of children should be met effectively within mainstream settings at Stage 1 or Stage 2 without an EHC Needs Assessment. An EHC Needs Assessment is appropriate only for children with long term needs associated with major difficulties in one or more of the four areas of need. In these cases, the severity of the child's special educational needs indicates a need for the Local Authority to become more actively involved. In such instances there will be detailed record of the SEND Support the child has received and how the child and family have been involved, a graduated approach to next steps, evidence based interventions tried and multi-agency involvement.

Characteristics that may indicate the need for an EHC Needs Assessment can be found in each section of this document.

It is expected that when a request for an EHC Needs Assessment is made, the child will have had SEND Support at Stage 2 over time.

This would equate to a minimum of one hour of individual support for each funded session attended as described in the section **Additional funding for Children with SEND**.

The evidence provided to support a request for an EHC Needs Assessment should show clearly how additional support at Stage 2 has been targeted.

- The child is failing to make adequate progress despite appropriate intervention at Stage 2;

or

- That there will be a need to sustain a high level of support over time to ensure the child continues to make adequate progress.

This period would include at least two cycles of 'assess, plan, do, review'

It should also provide clear evidence from the setting and from appropriate services and support professionals that the child's characteristics, are now such that an EHC Needs Assessment would be appropriate. For example, advice should be submitted from outside agencies or services in addition to the advice from the Early Years SEND Team.

The SEND Code of Practice: 'in a very few exceptional cases of young children where there are severe and complex needs, the extent of the needs will be evident. In such exceptional cases a Needs Assessment Request might be made prior to any intervention by a setting at Stage 1 or Stage 2. It is likely that such children will have a significant disability and have been supported by a multi-disciplinary team. Examples may include children with profound sensory impairment or those with significant physical or learning disability'

A record of the child's Send Support with a minimum of two cycles of review together with up to date reports from the key professionals working with the child should be submitted with a Needs Assessment Request. Please refer to the Central Bedfordshire Needs Assessment Pathway document for further guidance.

## **SEND funding for Education and Care:**

### **Children aged 3—5 years:**

Central Bedfordshire assists early years settings with additional funding to support children who have special educational needs. Settings can apply for this funding to employ an additional member of staff. Funding is for a maximum of one term initially. Exceptional needs funding is available for a small percentage of children whose needs are more severe and complex.

### **Disability Access Funding (DAF):**

For children aged three and four years old with SEND who are in receipt of Disability Living Allowance, settings are eligible to receive the government disability access funding, a one off lump sum paid per child per year.

### **Children under 3 years:**

Settings with children under 3 years who have additional needs can apply for inclusion funding.

More details about all SEND funding and application forms can found on the Central Bedfordshire Local Offer website.

<http://www.centralbedfordshire.gov.uk/children/sen-disability/local-offer/overview.aspx>

## Communication and Interaction

### The SEND Code of Practice 0-25 years

Identifying and assessing SEN for young children for whom their first language is not English requires particular care. Early Years practitioners should look carefully at all aspects of a child's learning and development to establish whether any delay is related to learning English as an additional language or if it arises from SEN or disability. Difficulties related solely to learning English as an additional language are not SEN (5.30)

Children and young people with speech, language and communication needs (SLCN) have difficulty in communication with others. This may be because they have difficulty saying what they want to, understanding what is being said to them or they do not understand or use social rules of communication. The profile for every child with SLCN is different and their needs may

Children and young people with an Autistic Spectrum Disorder, including Asperger's Syndrome and Autism, are likely to have particular difficulties with social interaction. They may also experience difficulties with language, communication, social interaction and imagination, which can impact on how they relate to others. (6.29)

### The Early Years Foundation Stage

Communication and language development involves giving children opportunities to experience a rich language environment; to develop their confidence and skills in expressing themselves; and to speak and listen in a range of situations. (1.6)

If a child does not have a strong grasp of English language, practitioners must explore the child's skills in the home language with parents and/or carer, to establish whether there is a cause for concern about language delay. (1.8)

### Speech, Language and Communication

For the majority of children, communication skills develop naturally over the course of the Early Years Foundation Stage, and development of the speech sound system is typically not complete until 6 or 7 years of age. Communication and language skills in general will continue to develop throughout life. Communication and interaction difficulties cover a wide and complex range of needs that frequently overlap. These include: -

#### Developmental language delay

Children may have a delay in one or more aspect of language (understanding, expression, interaction) but progress, however slow, follows a typical pattern of development.

#### Developmental language disorder

Children may show an uneven or unusual pattern in

one or more aspects of language (understanding, expression, interaction).

#### Phonological/speech difficulty

Children may have difficulty producing intelligible speech.

#### Receptive language difficulty

Children may have particular difficulty attaching meaning to words and developing concepts or have difficulties understanding complex grammar or implied meaning.

#### Expressive language difficulty

Children may have difficulty accessing vocabulary, using complex grammar, organising ideas, structuring sentences and conveying intended meaning change over time. They may have difficulty with one, some or all of the different aspects of speech, language or social communication at different times of their lives. (6.28)

## Speech, Language and Communication Provision

### Stage One

#### Parents/carers' and child's participation

- Parents/carers contribute to the assessment.
- Parents/carers participate in planning their child's SEND Support setting outcomes for progress, agreeing strategies and interventions, monitoring progress and reviews.
- Parents/carers participate in using strategies and interventions for progress to support their child at home.
- The child's views are taken account of.
- Parents/carers are aware of opportunities to learn how to help their child make progress e.g. useful websites.
- Parents/carers are informed about Central Bedfordshire's Local Offer website and CBC SEND Parent and Young Person Partnership Service.

### Stage Two

#### Parents/carers' and child's participation

- Parents/carers contribute to the assessment.
- Parents/carers participate in planning their child's SEND Support setting outcomes, monitoring progress and reviews.
- Parents/carers participate in using strategies and interventions for progress to support their child at home.
- The child's views are taken account of.
- Parents/carers have opportunities to work in partnership with practitioners and specialist support professionals to share knowledge and develop a consistent approach to developing the child's speech and language skills.
- Enhanced contact for parents with their child's key person in setting. Contact book or diary might be used to facilitate discussion of activities at home and in setting.
- Parents/carers are informed about Central Bedfordshire's Local Offer website and CBC SEND Parent and Young Person Partnership Service.

## Speech, Language and Communication Provision

### Stage One

#### **Assess, plan, do, review**

Assessment, planning and review will need to take account of whether the child attends more than one setting: -

- Setting supplements their normal systems of assessment, monitoring and planning by further observation in order to understand child's current interests, development and learning needs (i.e. needs that are additional to or different from what is usually provided for all children within the setting). Observation takes place around different activities and environments within the setting, e.g. outdoor environment or lunchtime.
- Planning of intervention involving the parent/carer, child, setting, SENCo and child's key person.
- SEND Support in place with long term outcomes and SMART short term outcomes
- Half termly (approximately 6 weekly) reviews of child's progress to inform planning for further SEND Support

### Stage Two

#### **Assess, plan, do, review**

Assessment, planning and review will need to take account of whether the child attends more than one setting: -

- Ongoing observation undertaken in order to understand child's current interests, development and learning needs that are additional to or different from what is usually provided for all children within the setting.
- Planning and intervention involving the parent/carer, child, setting SENCo, child's key person, and advising agencies.
- SEND Support in place with reviewed and planned SMART outcomes, which take account of specialist advice.
- Half termly (approximately 6 weekly) reviews of child's progress to inform planning for further SEND Support.
- Input or attendance made by appropriate external agencies to reviews of the SEND Support.

## Speech, Language and Communication Provision

### Stage One

#### Quality Learning Experiences

- Approaches used show acceptance and empathy for the child, support for their emotions, and aims to build positive relationships with them.
- Emphasis on providing an enabling environment both inside and outside, with developmentally appropriate resources. Differentiation for play and learning activities. Possibly some specific reinforcement or skill-development activities to support targeted progress.
- Content and presentation of language-based activities and materials at times e.g. story, singing:
  - Ensuring the child is appropriately placed.
  - Checking that the child is giving attention by saying their name.
  - Giving the child time to respond to comments and questions.
  - Repeating instructions individually to child.
  - Simplifying and/or reducing amount of language used.

### Stage Two

#### Quality Learning Experiences

- Approaches used show acceptance and empathy for the child, support for their emotions, and aims to build positive relationships with them.
- Emphasis on providing an enabling environment both inside and outside, with developmentally appropriate resources. Increased differentiation of access to learning and play activities and materials to reflect the child's developmental and language levels. Key learning outcomes are identified in SEND Support.
- Increased focus on specific activities and/or use of resources, including ICT and specialist equipment/materials/communication techniques, as identified through involvement of external agencies.
- Thought is given to how all adults are modelling language, and supporting the child's understanding and use of language across the range of learning and play activities:
  - 1:1 or small group activities.
  - Modelling and supporting the child's communication and language.
  - Varying pace of delivery.
  - Giving the child time to respond to comments and questions.
  - Using visual cues.
  - Supporting the child to focus and listen.
  - Providing opportunities to repeat/practice speech.

## Speech, Language and Communication Provision

### Stage One

#### Additional human and other resources

- All adults are aware of child's language needs, and give consideration to modifying the language they use with the child, and/or how to facilitate the child's use of language.
- Additional adult attention and/or support for some activities, including, verbal exchanges and play with other children, from practitioners already working in the setting.
- Supervision and monitoring of the child's progress towards the Early Years Foundation Stage Early Learning Goals by child's key person and setting SENCo.

### Stage Two

#### Additional human and other resources

- All adults are aware of child's language needs, and give consideration to modifying the language they use with the child, and/or how to facilitate the child's use of language in verbal exchanges and play with other children.
- Additional adult attention and/or support for a significant number of activities.
- Supervision and monitoring of SEND Support by the setting SENCo.
- Time allocated for key professionals to liaise with external agencies.
- Access to ICT and specialist equipment/materials if appropriate.

## Speech, Language and Communication Provision

### Stage One

#### Training and Advice

- Staff training needs are addressed, and information passed to other staff and parents as appropriate.
- Information, advice posters and leaflets about speech and language development are displayed in the setting.
- Advice may be sought from the Early Years SEND Team to inform planning.
- Practitioners are familiar with the Inclusion Development Programme Supporting Children with Speech, Language and Communication Needs: Guidance for practitioners in the Early Years Foundation Stage.
- Practitioners attend accredited Speech and Language course 'Talk for All'
- Practitioners attend training on how to deliver language booster groups e.g. 'Lift off to Language groups'
- Practitioners attend regular Communication Network Meetings.

### Stage Two

#### Training and Advice

- Staff training needs are addressed (e.g. in the use of augmented forms of communication, such as Makaton signing), and information passed to other staff and parents.
- Advice sought from the Early Years SEND Team to inform planning.
- Consultation with or individual referral to external agencies, including the NHS Speech and Language Therapy Service and/or the Central Bedfordshire Early Communication Speech and Language Team.
- Practitioners are knowledgeable about voluntary agencies/support groups/websites where parents/carers can seek advice and support.

**Speech, Language and Communication**  
**Early Years Foundation Stage Children's Characteristics 2 – 3 years**

Early Years Foundation Stage 2014	Stage One 16-26 months band	Stage Two 8-20 months band	EHC Needs Assessment Birth – 11 months band
<p><u>Communication and Language</u></p> <p><b>Listening and attention</b></p>	<ul style="list-style-type: none"> <li>• Listens to and enjoys rhythmic patterns in rhymes and stories.</li> <li>• Enjoys rhymes and demonstrates listening by trying to join in with actions or vocalisations.</li> <li>• Rigid attention – may appear not to hear.</li> <li>• Can 'listen' or 'do', needs adult support to shift attention to another task.</li> <li>• Starting to focus on an activity of their choice, although finds it difficult to be directed by an adult.</li> <li>• Using the child's name helps them to attend to what the adult says e.g. 'Ben drink juice', Aysha, coat on'</li> </ul>	<ul style="list-style-type: none"> <li>• Moves whole bodies to sounds they enjoy, such as music or a regular beat.</li> <li>• Has a strong exploratory impulse.</li> <li>• Concentrates intently on an object or activity of own choosing for short periods.</li> <li>• Pays attention to dominant stimulus – easily distracted by noises or other people talking. Interested in music and singing.</li> <li>• Attention is fleeting or over focused on a detail/object.</li> </ul>	<ul style="list-style-type: none"> <li>• Turns towards a familiar sound then locates range of sounds with accuracy.</li> <li>• Listens to, distinguishes and responds to intonations and sounds of voices.</li> <li>• Reacts in interaction with others by smiling, looking and moving.</li> <li>• Quietens or alerts to the sound of speech.</li> <li>• Looks intently at a person speaking, but stops responding if speaker turns away.</li> <li>• Listens to familiar sounds, words, or finger plays.</li> <li>• Fleeting attention – not under child's control, new stimuli takes whole attention.</li> <li>• Unable to attend to a task , flits from one activity to another showing little interest.</li> </ul>

**Speech, Language and Communication**  
**Early Years Foundation Stage Children's Characteristics 2 – 3 years**

Early Years Foundation Stage 2014	Stage One 16-26 months band	Stage Two 8-20 months band	EHC Needs Assessment Birth – 11 months band
<b>Understanding</b>	<ul style="list-style-type: none"> <li>• Selects familiar objects by name and will go and find objects when asked, or identify objects from a group.</li> <li>• Understands simple sentences e.g. 'Throw the ball'</li> <li>• Understands simple instructions in context following the routine of the day e.g. 'get mummy's shoes', 'put your bricks away', 'Tell dad tea's ready'. Beginning to understand instructions with 2 key words e.g. 'give the ball to teddy'</li> <li>• Understands the function of objects.</li> <li>• Understands 'where', 'what', 'who' questions.</li> <li>• Understands some basic action words, e.g. sleep, walk, go, jump.</li> <li>• Understands basic concepts, e.g. in/on/under/big/little/hot/cold/one/all.</li> </ul>	<ul style="list-style-type: none"> <li>• Developing the ability to follow others' body language, including pointing and gesture.</li> <li>• Responds to the different things said when a familiar context with a special person e.g. 'Where's Mummy? Where's your nose?'</li> <li>• Understanding of single words in context is developing, e.g. 'cup', 'milk', 'daddy'</li> <li>• Can understand more words than they can say.</li> <li>• Consistently collects one item when requested.</li> <li>• Limited understanding of basic concepts.</li> <li>• Requires visual support to carry out instruction.</li> </ul>	<ul style="list-style-type: none"> <li>• Does not respond to their name.</li> <li>• Unable to understand contextual clues, e.g. familiar gestures, words and sounds.</li> <li>• Unable to follow simple instructions, even with visual support.</li> <li>• Unable to point out family members/familiar people.</li> <li>• May appear isolated.</li> <li>• Interaction is limited.</li> </ul>

## **Communication and Interaction**

### **Social Communication Difficulties and Autistic Spectrum Disorder**

Children with a social communication difficulties have persistent needs in the social use of verbal and non-verbal communication. Typical characteristics of this disorder are described under 'Area of need' headings; *Interaction and Relationships* and *Language and Communication*.

Children diagnosed with an Autistic Spectrum Disorder will also have difficulties in these two areas, but can be differentiated by the additional presence of characteristics described under the 'Area of need' heading: *Inflexibility in Thinking and behaviour*. They may also experience difficulties in *Sensory processing*.

The combined challenges experienced by children with Social Communication and Autistic Spectrum Disorders may impact on their Personal, Emotional development and Well-being.

Social Communication and Autistic Spectrum Disorders are medical diagnosis based on Neurodevelopment Disorders, resulting in developmental differences in each of the relevant areas of need.

The way in which these differences impact on how the child understands and interacts with the world around them will be unique to each individual. They can occur across the full ability range and for children with ASD are frequently associated with feelings of anxiety.

Other factors that affect the individual presentation may include:

- Characteristics occurring with differing degrees of severity or an uneven profile.
- Possibility of changes occurring with increasing age and/or difficulties may become more apparent at times of increasing demand.
- The possible existence of associated needs, for example; learning difficulties, coordination and motor function difficulties or epilepsy.
- Education, social environment and personality.

All settings should be familiar with the Inclusion Development Programme Supporting Children on the Autistic Spectrum Guidance for practitioners in the Early Years (2009).

## Social Communication Difficulties/Autistic Spectrum Disorder Provision

Stage One	Stage Two
<p><b>Parents/Carers' and child's participation</b></p> <ul style="list-style-type: none"> <li>• Parents/carers contribute to assessment.</li> <li>• Parents/carers give informed written consent for the involvement of external agencies.</li> <li>• Parents/carers participate in planning their child's SEND Support setting outcomes for progress, agreeing strategies and interventions, monitoring progress and reviews.</li> <li>• Parents/carers participate by being involved in supporting planned outcomes for their child in the home.</li> <li>• The child's views are taken account of.</li> <li>• Opportunities for parents/carers to work in partnership with practitioners and specialist support professionals to share knowledge and develop a consistent approach to developing their child's social communication skills.</li> <li>• Enhanced contact for parents with their child's key person in the setting. ## Cognition and Learning

### SEND Code of Practice 0-25 years

'In assessing progress of children in the early years, practitioners can use the non-statutory Early Years Outcomes guidance as a tool to assess the extent to which a young child is developing at expected levels for their age. The guidance sets out what most children do at each stage of their learning and development. These include typical behaviours across the seven areas of learning' (5.21.)

'Where a child appears to be behind expected levels, or where a child's progress gives cause for concern, practitioners should consider all the information about the child's learning and development from within and beyond the setting, from formal checks, from practitioner observations and from any more detailed assessment of the child's needs. From within the setting practitioners should particularly consider information on a child's progress in communication and language, physical development and personal, social and emotional development.

Where any specialist advice has been sought from beyond the setting, this should also inform decisions about whether or not a child has SEN. All the information should be brought together with the observations of parents and considered with them' (5.28.)

### The Early Years Foundation Stage

Practitioners must consider the individual needs, interests, and stage of development of each child in their care, and must use this information to plan a challenging and enjoyable experience for each child in all of the areas of learning and development. Practitioners working with the youngest children are expected to focus strongly on the three prime areas, which are the basis for successful learning in the other four specific areas. The three prime areas reflect the key skills and capacities all children need to develop and learn effectively, and become ready for school.

It is expected that the balance will shift towards a more equal focus on all areas of learning as children grow in confidence and ability within the three prime areas. But throughout the early years, if a child's progress in any prime area gives cause for concern, practitioners must discuss this with the child's parents and/or carers and agree how to support the child. Practitioners must consider whether a child may have a special educational need or disability which requires specialist support. They should link with, and help families to access relevant services from other agencies as appropriate' (1.6.)

The Guidance for SEND in the Early Years uses the Early Years Outcomes as the Cognition and Learning Children's Characteristics to help practitioners decide where the child's knowledge and skills are and the level of SEND Support that should be in place. In partnership with parents and carers, practitioners should plan interventions and strategies which are appropriate to the age and

stage of the development of the child whilst having the highest expectations for the child's learning and development.

The age band characteristics are statements relating to a child's development. When using these statements either in the planning of SEND Support and/or as evidence in a Needs Assessment Request for an EHC Plan examples of parents, carers and practitioner's observations should be included to give a more detailed picture of the child's learning and development.

Practitioners should also consider the provision characteristics and use them to guide which strategies and interventions they use in planning SEND support for children.

## Cognition and Learning Provision

Stage One	Stage Two
<p><b>Parents/carers' and child's participation</b></p> <ul style="list-style-type: none"> <li>• Parents/carers contribute to assessment.</li> <li>• Parents/carers participate in setting long and short term outcomes for their child's SEND Support, monitoring progress and reviews, and be involved in supporting outcomes in the home.</li> <li>• The child's views are taken account of.</li> <li>• Opportunities for parents/carers to learn how to help their child further.</li> <li>• Parents/carers are informed about Central Bedfordshire's Local Offer website and CBC SEND Parent and Young Person Partnership Service.</li> </ul>	<p><b>Parents/carers' and child's participation</b></p> <ul style="list-style-type: none"> <li>• Parents/carers contribute to assessment.</li> <li>• Parents/carers participate in setting long and short term outcomes for their child's SEND Support, monitoring progress and reviews, and be involved in supporting outcomes in the home.</li> <li>• The child's views are taken account of.</li> <li>• Opportunities for parents/carers to work in partnership with practitioners and specialist support professionals to share knowledge and develop a consistent approach to developing the child's skills and independence.</li> <li>• Enhanced contact for parents/carers with key person in setting. Contact book or diary might be used to facilitate discussion of activities at home and in setting.</li> <li>• Parents/carers are informed about Central Bedfordshire's Local Offer website and CBC SEND Parent and Young Person Partnership Service.</li> </ul>

Cognition and Learning Provision	
Stage One	Stage Two
<p><b>Assess, plan, do review</b></p> <p>Assessment, planning and review will need to take account of whether the child attends more than one setting: -</p> <ul style="list-style-type: none"> <li>• Setting supplements their normal systems of assessment, monitoring and planning by further observation in order to understand child's current interests, development and learning needs (i.e. needs that are additional to or different from what is usually provided for all children within the setting). Observation takes place around different activities and environments within the setting, e.g. outdoor environment, or at lunchtime.</li> <li>• Planning interventions involving the parent/carer, child, setting, SENCo and child's key person.</li> <li>• SEND Support in place with long term outcomes and SMART short term outcomes.</li> <li>• Half termly (approximately 6 weekly) reviews of child's progress to inform SEND Support.</li> </ul>	<p><b>Assess, plan, do review</b></p> <p>Assessment, planning and review will need to take account of whether the child attends more than one setting: -</p> <ul style="list-style-type: none"> <li>• Ongoing observation undertaken in order to understand child's current interests, development and learning needs that are additional to or different from what is usually provided for all children within the setting.</li> <li>• Planning and intervention involving the parent/carer, child, setting SENCo, child's key person, and advising agencies.</li> <li>• SEND Support in place with reviewed and planned SMART outcomes, which take account of specialist advice.</li> <li>• Half termly (approximately 6 weekly) reviews of child's progress to inform the SEND Support.</li> <li>• Input or attendance made by appropriate external agencies to review the SEND Support.</li> </ul>

Pretend play sometimes shows representation and beginnings of role play, but the child doesn't typically develop or extend the play spontaneously and involve others (e.g. they use one object to represent another, especially when objects have characteristics in common, such as a brick as a car; a block on a plate as a cake; a banana as a telephone). They may use other people's belongings in pretend play, (e.g. Mum's bag and brush). May pretend play with small world toys.</li> </ul>	<ul style="list-style-type: none"> <li>• Expresses self through physical action and sound.</li> <li>• Pretends that one object represents another, especially when objects have characteristics in common.</li> <li>• Pretend play is limited to simple pretend with some elements of representation, (e.g. brushing doll's hair, pretending to be asleep (covers self with a blanket and closes eyes).</li> </ul>

## Social, Emotional and Mental Health

### The SEND Code of Practice 0-25 years

A delay in learning and development in the early years may or may not indicate that a child has SEN that is that they have a learning difficulty or disability that calls for special educational provision. Equally difficult or withdrawn behaviour does not necessarily mean that a child has SEN. However, where there are concerns, there should be an assessment to determine whether there are any causal factors such as an underlying learning or communication difficulty. If it is thought housing, family or other domestic circumstances may be contributing to the presenting behaviour, a multiagency approach, supported by the use of approaches such as the Early Help Assessment, should be adopted. (5.29)

### The Early Years Foundation Stage

Personal, Social and Emotional Development (PSED) is one of the three primary areas of the Statutory Framework for the Early Years Foundation Stage.

A delay in development in language and communication or cognition and learning may cause a child to present as either withdrawn or over enthusiastic.

Children new to the setting, in a stage of transition in the same setting and/or a change of key person may

mean some children take time to settle and feel secure. Settings should take this into account giving children time to become familiar with new routines and expectations.

A strong partnership with parents/carers is key to planning and reviewing successful outcomes for children.

Settings should take a holistic view when a child presents with unusual patterns of behaviour. Children's responses to changes in their circumstance, e.g. the arrival of a new baby or if a member of staff leaves can be quite common causes of a change in a child's behaviour. However, practitioners should also be aware that sudden changes in a child's behaviour could be indicative of issues requiring a response under the guidelines for 'Safeguarding and Welfare Requirements'

For some young children difficulties or delays in their personal, social and emotional development may mean they appear withdrawn or isolated, or that they prefer to be close to an adult at all times or that their behaviour is unusually disruptive and challenging.

Early Years practitioners have a range of strategies they use to help young children develop their self-confidence and awareness, manage their feelings and behaviour and to make good relationships. These apply to all children and are not a part of special education provision.

All children develop differently and have different experiences. Early Years practitioners apply an holistic approach in their care of young children. In accordance with the Early Years Framework for the Early Years Foundation Stage each child has a key person in the setting with whom they and their parents or carers can make a close relationship. The child's key person works together with the child's family and carers to be aware of any significant events or changes inside or outside of the setting that may affect the child's emotional well-being.

If a young child demonstrates persistent disruptive or withdrawn behaviour the child's key person will, together with parents and carers explore the cause(s) or reason(s) behind the behaviour. The child's key person will then support the child with different activities and strategies. A flexible approach is key with recognition that a change of routines and/or environment can often be most effective.

When a young child is identified as needing support practitioners should have regard to the provision characteristics when planning SEND support. It is necessary to observe and record the difficulties that are causing concern. Interventions can then be evaluated and further support planned.

The review cycle would typically take place over stages 1 and 2 with six weekly intervals at each stage. At stage 2 settings should consult with

relevant support services to consider the nature of the difficulty and advice.

If a child's behaviours escalate quickly, in spite of appropriate strategies being put in place, the review cycle may need to be shortened.

### **Needs assessment request**

Some young children may display difficulties of an extreme nature that require a higher level of support than is reasonable for a setting to provide over a sustained period of time. In these cases, evidence will be judged on the degree to which social, emotional and mental health needs have an effect on:

- Practitioner/teacher time.
- Access to learning activities.
- The safety and welfare of the child, other children and staff.

The degree and complexity of these behaviours for any child will need to be measured against:

- The inappropriateness of the behaviour with regard to the age and stage of development and to the context in which the behaviour occurs.
- Frequency.
- Intensity.
- Duration.
- Persistence over time.

## Social, Emotional and Mental Health Provision

Stage One	Stage Two
<p><b>Parents/carers' and child's participation</b></p> <ul style="list-style-type: none"> <li>• Parents/carers contribute to assessment.</li> <li>• Parents/carers participate in setting long and short term. outcomes for their child's SEND Support, monitoring progress and reviews, and be involved in supporting outcomes in the home.</li> <li>• The child's views are taken account of.</li> <li>• Opportunities for parents/carers to discuss how to help their child further using a range of outside agencies.</li> <li>• Parents/carers are informed about Central Bedfordshire's Local Offer website and CBC SEND Parent and Young Person Partnership Service.</li> </ul>	<p><b>Parents/carers' and child's participation</b></p> <ul style="list-style-type: none"> <li>• Parents/carers contribute to assessment and reviewing of strategies used in the setting and at home.</li> <li>• Parents/carers participate in planning outcomes for their child's SEND Support, monitoring progress and reviews, and be involved in supporting outcomes in the home.</li> <li>• The child's views are taken account of.</li> <li>• Opportunities for parents/carers to work in partnership with practitioners and specialist support professionals to share knowledge and develop a consistent approach to developing their child's skills and independence.</li> <li>• Enhanced contact for parents/carers with key person in setting. Contact book or diary might be used to facilitate discussion of activities at home and in setting.</li> <li>• Parents/carers are informed about Central Bedfordshire's Local Offer website and CBC SEND Parent and Young Person Partnership Service.</li> </ul>

Social, Emotional and Mental Health Provision	
Stage One	Stage Two
<p><b>Assess, plan, do review</b></p> <p>Assessment, planning and review will need to take account of whether the child attends more than one setting: -</p> <ul style="list-style-type: none"> <li>• Setting supplements their normal systems of assessment, monitoring and planning by further observation in order to understand child's current interests, development and learning needs (i.e. needs that are additional to or different from what is usually provided for all children within the setting). Observation takes place around different activities and environments within the setting, e.g. outdoor environment, or lunchtime.</li> <li>• Planning of intervention involving the parent/carer, child, setting, SENCo and child's key person.</li> <li>• SEND Support in place with SMART outcomes.</li> <li>• Half termly (approximately 6 weekly) reviews of child's progress to inform SEND Support.</li> </ul>	<p><b>Assess, plan, do review</b></p> <p>Assessment, planning and review will need to take account of whether the child attends more than one setting: -</p> <ul style="list-style-type: none"> <li>• Ongoing observation undertaken in order to understand child's current interests, development and learning needs that are additional to or different from what is usually provided for all children within the setting.</li> <li>• Setting implements, a behaviour log e.g. ABC chart to highlight patterns and to show frequency, intensity, duration and persistence over time.</li> <li>• Planning and intervention involving the parent/carer, child, setting SENCo, child's key person, and advising agencies.</li> <li>• SEND Support in place with reviewed and planned SMART outcomes, which take account of specialist advice.</li> <li>• Half termly (approximately 6 weekly) reviews of child's progress to inform SEND Support.</li> <li>• Input or attendance by appropriate external agencies or advisors to review the SEND Support.</li> </ul>

## Social, Emotional and Mental Health Provision

Early Years Foundation Stage 2014	Stage One	Stage Two	EHC Needs Assessment
<u>Personal Social and Emotional Development</u>	<p>Depending on the age and stage of development and the experience of the child who is receiving support from all adults in the setting he/she:</p> <ul style="list-style-type: none"> <li>• Often seeks attention inappropriately.</li> <li>• Requires frequent prompts and reminders to stay on task in adult led activities.</li> <li>• Seeks frequent contact with adults sometimes displaying anxiety</li> <li>• Finds it difficult to separate from main carer and is taking a longer period of time than most children to bond with their key person.</li> <li>• Often needs an adult to encourage them to take part in activities.</li> <li>• Is sometimes tearful and anxious in group activities.</li> <li>• Occasionally displays behaviour which interrupts other children's play.</li> <li>• Easily becomes frustrated and may display this as tantrums.</li> <li>• Occasionally refuses to conform with adult requests.</li> </ul>	<p>Despite the close individual adult support in place and a range of strategies tried he/she:</p> <ul style="list-style-type: none"> <li>• Has social, emotional and/or mental health difficulties which substantially interfere with their development of knowledge and skills and that of their peer group.</li> <li>• Continues to make little or no progress despite interventions designed to improve aspects of their social and emotional and/or mental health.</li> </ul> <p>The difficulties experienced may include:</p> <ul style="list-style-type: none"> <li>• Refusal to follow routines/requests and/or directions from adults.</li> <li>• Frequent use of inappropriate language and physical contact causing harm to themselves or others.</li> <li>• Inability to play and socially interact with other children without adult support.</li> <li>• Needs frequent adult prompts to focus their attention during a short story or group activity e.g. additional adult is required to sit next to them.</li> </ul>	<p>Appropriate support over a period of time has taken a holistic approach which takes into account the age and stage of the child and the child's experiences. The support has included a range of appropriate interventions. Indicators will include:</p> <ul style="list-style-type: none"> <li>• There is a demonstrable and significant effect on the child's progress with the appropriate advice being taken and the appropriate support being provide by the setting.</li> </ul> <p><b>and</b></p> <ul style="list-style-type: none"> <li>• The child's behaviours within the setting are regularly disruptive and unpredictable.</li> </ul> <p><b>and</b></p> <ul style="list-style-type: none"> <li>• Evidence has been collected and recorded over at least two reviewed cycles to show that the child's behaviours are qualitatively different from that of his or her peers and that there is a lack of significant response despite appropriate interventions to address the difficulties the child is experiencing.</li> </ul>

**Social, Emotional and Mental Health**  
**Early Years Foundation Stage Children's Characteristics**

Early Years Foundation Stage 2014	Stage One	Stage Two	EHC Needs Assessment
<u>Personal Social and Emotional Development</u>	<p>Depending on the age and stage of development and the experience of the child who is receiving support from all adults in the setting he/she:</p> <ul style="list-style-type: none"> <li>• Sometimes gets too close to other children whilst playing alongside them.</li> <li>• Sometime uses an inappropriately loud voice to tell children what to do.</li> <li>• Often prefers to lead play in a group and will leave if not allowed to.</li> <li>• Can take turns in play in structured activities and share with adult supervision.</li> <li>• Sometimes needs adult support/distraction to recover from an outburst of temper.</li> </ul>	<p>Depending on the age and stage of development and the experience of the child and despite close adult support he/she:</p> <ul style="list-style-type: none"> <li>• Reluctance to share or take turns even with adult support during most sessions.</li> <li>• Displays possessiveness with toys, often grabs and snatches toys from other children during a session.</li> <li>• Frequently displays behaviour which interrupts the play of other children.</li> <li>• Continues to be unable to separate from main carer after a prolonged 'settling in' program.</li> <li>• Withdrawn, tearful, unhappy and anxious behaviour especially when left alone.</li> <li>• Often reluctant to engage in activities. Requires a familiar adult nearby and can be very clingy.</li> </ul>	<p>Or</p> <p>All involved agree that a sudden and serious deterioration in a child's presentation has taken place requiring a high level of support on a consistent basis</p> <p>In addition to the above a setting should be able to demonstrate that:</p> <ul style="list-style-type: none"> <li>• Relevant outside agency support has been accessed as necessary with advice being acted upon and regularly reviewed.</li> <li>• Outcomes are clearly evaluated and modified as appropriate to address the child's needs.</li> </ul>

## Sensory and/or Physical Needs

### The SEND Code of Practice 0-25 years

Some children and young people require special educational provision because they have disability which prevents or hinders them from making use of the educational facilities generally provided. These difficulties can be age related and may fluctuate over time. Many children and young people with vision impairment (VI), hearing impairment (HI) or a multi-sensory impairment (MSI) will require specialist support and/or equipment to access their learning or rehabilitation support. Children and young people with an MSI have a combination of vision and hearing difficulties. (6.34)

### Equality Act 2010

All early years providers have duties under the Equalities Act 2010. In particular, they **must not** discriminate against, harass or victimise disabled children, and they **must** make reasonable adjustments, including the provision of auxiliary aids and services for disabled children to prevent them being put at substantial disadvantage. This duty is anticipatory-it requires thought to be given in advance to what disabled children and young people might require and what adjustments might need to be made to prevent that disadvantage. All publicly funded early years providers **must** promote equality of opportunity for disabled children

### Hearing Impairment

Some children are born deaf and others may become deaf later in life, for example as a result of an illness. The two main types of deafness are Conductive Deafness and Sensorineural Deafness. Conductive deafness is the most common amongst young children and is usually but not always caused by fluid building up in the middle ear, preventing sounds from passing through the middle ear from the outer ear to the inner ear, this type of deafness is also referred to as 'glue ear' and will generally be a mild to moderate loss.

NB; a moderate hearing loss can have a significant impact on language acquisition especially if the loss is over a long time period and/or has gone un-diagnosed during the child's formative years. Antibiotics or grommets can alleviate this, at least temporarily, and most children will out-grow middle-ear infection. Whilst the child is subject to 'glue ear' (congested), they will have a hearing-impairment.

Sensorineural hearing loss is caused by damage to the inner ear or auditory nerve and cannot be treated, so the hearing loss is permanent. Sensorineural hearing loss can range in severity described depending on the degree of the loss, as mild, moderate, severe or profound. In the majority of cases hearing aids will be prescribed by the child's audiology department. This will amplify sound but will not necessarily improve the

quality of the speech heard. Children with a Sensorineural hearing loss can also suffer from 'glue ear'. When this happens residual aided hearing will be affected resulting in a further reduction in access to sounds. Children with a combination of both types of deafness will be referred to as suffering a sensorineural loss with a conductive overlay.

Within the learning environment good acoustics are crucial if the child is to access directed speech and incidental (overheard) language effectively. If the environment is subject to high levels of background noise, such as the radio playing loudly all day or external sources of noise, speech will be masked, which will impact on the hearing impaired child's access and therefore their ability to develop language competency. Further information regarding acoustics can be found within the National Deaf Children's Society (NDCS) or via Harlington Area School Trust's (HAST) peripatetic hearing impairment service.

The National Deaf Children's Society, in their Deaf Friendly Teachers Training Pack says, 'Children develop communication, learning and social skills in their day-to-day activities. The impact of deafness on these areas will be different for individual children. No two deaf children are the same and any levels of deafness can affect a child's access to their environment.'

Deafness is likely to affect a child's ability or willingness to:

- Initiate conversations.

- Use appropriate language.
- Express their feelings and emotions.
- Be fully included in large groups.
- Develop confidence and self-esteem.
- Learn appropriate social behaviour incidentally.

## Visual Impairment

Some children are born with a severe visual impairment; others may become visually impaired during their school years, for example due to genetic causes or accidents. The severity of the visual impairment can differ widely amongst children who have the same condition. Prescription glasses may help improve a child's vision but may not fully correct the child's vision. Glasses may not be easily tolerated by a child. A visual impairment may be caused by a problem in the eye itself (e.g. cornea, retina), the optic nerve, visual cortex or the muscles surrounding the eye. *"Vision acts as a bridge between information from our other senses. Sight unifies, co-ordinates and is informed by input from touch and hearing. Vision perception is a major area of activity for the human brain. It has been estimated that between 70% - 80% of the total information the brain receives comes from the visual pathways".* Olga Miller: 'Supporting Children with Visual Impairment in mainstream schools'

A severe visual impairment might affect a child's opportunity to:

- Move about freely.
- Learn about the immediate environment.
- Learn about the wider environment.
- Access learning in and out of school.
- Be completely independent.
- Be an active member of a peer group.
- Develop confidence and self-esteem.
- Learn appropriate social behaviour.

## Physical difficulties

Children with physical difficulties are all affected in different ways. Some children can walk, sit up and talk, although they may take longer to develop these skills. Other children may require a high level of support to enable them to be fully included.

Some children with physical difficulties may also have learning difficulties or other difficulties such as a hearing or visual impairment, or speech, language and communication difficulties. They may also have a medical condition, for example, epilepsy.

A physical difficulty might affect a child's opportunity to:

- Make use of the furniture and equipment generally available in the nursery.
- Move about freely.
- Communicate effectively.
- Be an active member of a peer group.
- Be included in all areas of the curriculum.

Many of these children will require some of the following:

- Appropriate seating.
- Adaptations to the physical environment of the setting.
- Access to alternative or augmented forms of communication.
- Access to specialist equipment/materials.
- Adult support.
- Regular and frequent access to specialist support.

**It is important for children with physical disabilities to be supported in gaining as much independence as possible** and, therefore, they may need a high level of adult support initially. For example, a child may need help in learning to use the toilet independently, to safely use outdoor equipment or to change footwear.

## Sensory, Physical and Neurological (Multi-Sensory) Impairment

Some children who experience sensory, physical or neurological impairments have no difficulty in attaining the expected outcomes in the Early Years Foundation Stage or in accessing the learning opportunities offered in play and teaching activities. Other children do have difficulty accessing the teaching and learning activities due to their sensory loss and/or their physical disability. Settings must make suitable adaptations wherever possible and seek the advice of any other professionals (e.g. Qualified Teacher for the Multi-Sensory Impaired,

Qualified Teacher for the Deaf, Qualified Teacher for the Visually Impaired, Physiotherapist, Occupational Therapist) engaged in supporting the child and family.

If the child has a sensory and/or physical difficulties and is unable to maintain the expected progress despite differentiated teaching, learning and play activities, including the availability of additional equipment the setting should consider what SEN action they need to take to meet the child's learning and development needs. The advice in the provision characteristics for all of the areas of sensory impairments and difficulties should be used as a guide for settings and parents/carers.

### **Medical Conditions**

All Early Years providers should take steps to ensure that children with medical conditions get the support required to meet those needs. This is set out in the EYFS framework. (5.11 Special Educational Needs and Disability Code of Practice 0 -25 2014)

A medical diagnosis or a disability does not necessarily imply SEND. It may not be necessary for a child or young person with any particular diagnosis or medical condition to need any form of additional educational provision at any phase of education. It is the child's educational needs rather than a medical diagnosis that must be considered. Some children may not require school based SEND provision or EHC plans but

may have medical conditions that, if not properly managed, could hinder their access to education.

Medical conditions may have a significant impact on a child's experience and the way they function in an early years setting. The impact may be direct in that the condition may affect cognitive or physical abilities, behaviour or emotional state. The impact may also be indirect, perhaps disrupting regular attendance through unwanted effects of treatments or through the psychological effects that serious or chronic illness or disability can have on a young child and their family. The effects of a medical condition may be intermittent and the impact on a child's functioning in an early years setting can vary.

If a child has a medical condition a detailed care plan should be written in consultation with parents and the outreach nurse or other suitable medical practitioner. It should be kept up to date, and a copy held in the setting.

## Hearing Impairment Provision

## Hearing Impairment Provision

### Stage One

#### **Early Years Foundation Stage – supporting development and learning**

- Approaches used show acceptance and empathy for the child, support for their emotions, and aims to build positive relationships with them.
- Emphasis on providing an enabling environment both inside and out, with increased differentiation of activities, availability of resources and materials, to reflect child's hearing needs.
- Limited modifications to, and differentiation of the setting, to ensure access.

#### **Training and advice**

- Staff training needs are addressed by Qualified Teacher of the Deaf (QTOD) and information is passed to other staff and parents as appropriate. This will help to inform planning.
- Ongoing parental involvement and support.
- Liaison with other agencies as appropriate.

### Stage Two

#### **Early Years Foundation Stage – supporting development and learning**

- Approaches used show acceptance and empathy for the child, support for their emotions, and aims to build positive relationships with them.
- Emphasis on providing an enabling environment both inside and out, with increased differentiation of activities, availability of resources and materials, to reflect child's hearing needs.
- Increased focus on specific activities and/or use of resources, including ICT and specialist equipment/materials/communication techniques, as identified through Qualified Teacher of the Deaf (QTOD).
- The child may need individual materials to ensure appropriate access.

#### **Training and advice**

- Support and advice concerning the educational impact of the child's hearing impairment for staff from a Qualified Teacher of the Deaf (QTOD). This informs planning.
- Staff attend training and disseminate information to appropriate members of staff.
- Advice sought on an ongoing basis from a Qualified Teacher of the Deaf (QTOD).
- Ongoing parental involvement and support.
- Practitioners knowledgeable about voluntary agencies/support groups who can give advice/support to parents/carers.

### Early Years Foundation Stage Children's Characteristics

<b>Early Years Foundation Stage 2014</b>	<b>Stage 1</b>	<b>Stage 2</b>	<b>EHC Needs Assessment Request</b>
<p><b><u>Personal, Social and Emotional Development</u></b></p> <p><b><u>Language and communication</u></b></p> <p><b>Listening and attention</b></p>	<ul style="list-style-type: none"> <li>• This may be expressed in ways that appear withdrawn, aggressive, destructive or oppositional in nature.</li> <li>• Listening skills may be less developed than other same-age children.</li> <li>• Speaker may need to ensure that they have the child's attention and eye contact and visual cues before speaking, particularly in busy or noisy environments.</li> <li>• May need additional visual aids when listening in a busy or noisy environment.</li> <li>• May have short attention span.</li> <li>• May need attention redirecting/focusing in listening situations.</li> <li>• May find concentrating/listening difficult where there is background noise.</li> </ul>	<ul style="list-style-type: none"> <li>• This may be expressed in ways that appear withdrawn, aggressive, destructive or oppositional in nature.</li> <li>• Listening skills may be less developed than other same-age children.</li> <li>• Speaker may need to ensure that they have the child's attention and eye contact and visual cues before speaking, particularly in busy or noisy environments.</li> <li>• May show some delay in responding to spoken language and need encouragement to respond.</li> <li>• May have short attention span.</li> <li>• May need attention redirecting/focusing in listening situations.</li> <li>• May find concentrating/listening difficult where there is background noise.</li> </ul>	<ul style="list-style-type: none"> <li>• This may be expressed in ways that appear withdrawn, aggressive, destructive or oppositional in nature.</li> <li>• Needs constant simplification and repetition with clear grammatical language, visual cues and redrafting.</li> <li>• Will need 1:1 support to help with access and supplement information to aid understanding</li> </ul>

**Hearing Impairment**  
**Early Years Foundation Stage Children's Characteristics**

Early Years Foundation Stage 2014	Stage 1	Stage 2	EHC Needs Assessment Request
<b>Understanding of language</b>	<ul style="list-style-type: none"> <li>• Understanding of language is age appropriate or close to age appropriate.</li> <li>• May need two-part instructions breaking down into component parts and repeating.</li> <li>• Child benefits from 1:1 support and additional advice from Qualified Teacher of the Deaf.</li> </ul>	<p><b>Can range from being able to:</b></p> <ul style="list-style-type: none"> <li>• Follow simple directions relating to what they are doing (e.g. 'Sit down', 'Feed Teddy', 'Kiss Daddy night-night')</li> </ul> <p><b>To</b></p> <ul style="list-style-type: none"> <li>• Understanding sentences such as 'Put away your toys and we'll read a book', and responding to simple two-part instructions or requests (e.g. 'Get your shoes and put on your coat')</li> <li>• May need objects, pictures, gestures or other visual information to enable understanding in less familiar contexts</li> </ul>	<ul style="list-style-type: none"> <li>• Takes longer than other same age children to acquire the meaning of new words for daily items or routines.</li> <li>• Needs daily planned activities to repeat the language associated with familiar objects and routines in order to show understanding of them.</li> <li>• Understanding of new words may not be maintained unless over-learned.</li> <li>• Needs repeated exposure to new activity with visual support to reinforce language, e.g. objects, pictures, gestures, before able to show consistent understanding of language used in that context.</li> </ul>

**Hearing Impairment**  
**Early Years Foundation Stage Children's Characteristics**

Early Years Foundation Stage 2014	Stage 1	Stage 2	EHC Needs Assessment Request
<b>Use of language</b>	<ul style="list-style-type: none"> <li>• Generally age appropriate language structure</li> <li>• Generally age appropriate or close to age appropriate language and communication strategies</li> </ul>	<p><b>Can range from being able to:</b></p> <ul style="list-style-type: none"> <li>• Produce utterances consisting of single words.</li> </ul> <p><b>To</b></p> <ul style="list-style-type: none"> <li>• Producing utterances where length, intonation, etc. are more age-appropriate. Intelligibility may vary.</li> <li>• Use some single words or learnt phrases appropriately, and some 'gobbledegook' to convey meaning. Some of these may be 'own words' which only familiar adults are able to interpret</li> </ul> <p><b>To</b></p> <ul style="list-style-type: none"> <li>• Beginning to use little 'sentences' by joining 2 or 3 words together, e.g. "Daddy (has gone to) work".</li> <li>• May occasionally use longer sentences (e.g. 'Mummy go shops now'). Asks simple questions (e.g. 'Where's Mummy?').</li> <li>• Often making attempts to get their meaning across in new situations, e.g. by pointing, showing objects, gestures, taking adult by the hand).</li> </ul>	<ul style="list-style-type: none"> <li>• Utterances may be single words and 2 or 3 words which are unintelligible to all but a familiar listener - incomplete articulation and lacking intonation, appropriate pitch or volume. Demonstrates improvement with developing auditory discrimination.</li> <li>• Use of language is limited to naming and commenting in relation to familiar activities and routines.</li> <li>• Use of any known language accompanied by pointing and showing objects, gestures and taking a familiar adult by the hand.</li> </ul>

**Hearing Impairment**  
**Early Years Foundation Stage Children's Characteristics**

Early Years Foundation Stage 2014	Stage 1	Stage 2	EHC Needs Assessment Request
<b>Speech</b>	<ul style="list-style-type: none"> <li>• Child is understood most of the time.</li> <li>• Child may appear reserved or may use an over-loud voice.</li> </ul>	<p><b>Can range from:</b></p> <ul style="list-style-type: none"> <li>• Having speech that is very difficult to understand, except by a familiar adult in context and/or unless accompanied by gestures and other cues.</li> </ul> <p><b>To</b></p> <ul style="list-style-type: none"> <li>• Speech that is understandable from context and child being understood most of the time.</li> </ul>	<ul style="list-style-type: none"> <li>• Speech may be difficult to understand, even for familiar adult. Demonstrates improvement with developing auditory discrimination.</li> <li>• Speech may show minimal development despite targeted work.</li> </ul>

## Visual Impairment Provision

### Stage One

#### Parents/carers' and child's participation

- Parents/carers contribute to assessment.
- Parents/carers participate in planning their child's SEND Support, monitoring progress and reviews, and be involved in supporting outcomes in the home.
- The views of the child are taken account of.
- Opportunities for parents/carers to learn how to help their child further.
- Parents/carers are informed about Central Bedfordshire's Local Offer website and CBC SEND Parent and Young Person Partnership Service.

#### Assess, plan, do review

Assessment, planning and review will need to take account of whether the child attends more than one setting: -

- Setting supplements their normal systems of assessment, planning and reviewing by further observation in order to understand child's current interests, developments and learning needs (i.e. needs that are additional or different from what is usually provided for all children within the setting), e.g. outdoor environment, at lunchtime.
- Planning and intervention involving the parent/carer, child, setting SENCo, child's key person, and takes account of any existing advice from a Qualified Teacher of the Visually Impaired (QTVI).
- Parents/carers participate in SEND Support monitoring progress and reviews.
- Half termly (approximately 6 weekly) reviews of child's progress to inform SEND Support.

### Stage Two

#### Parents/carers' and child's participation

- Parents/carers contribute to assessment.
- Parents/carers participate in planning their child's SEND Support, monitoring progress and reviews, and be involved in supporting outcomes in the home.
- The child's views are taken account of.
- Opportunities for parents/carers to work in partnership with practitioners and specialist support professionals to share knowledge and develop a consistent approach to developing the child's skills and independence.
- Enhanced contact for parents with their child's key person in the setting. Contact book or diary might be used to facilitate discussion of activities at home and in setting.
- Parents/carers are informed about Central Bedfordshire's Local Offer website and CBC SEND Parent and Young Person Partnership Service.

#### Assess, plan, do review

Assessment, planning and review will need to take account of whether the child attends more than one setting: -

- Ongoing observation undertaken in order to understand the child's current interests, development and learning needs that are additional to or different from what is usually provided for all children within the setting.
- Planning and intervention involving the parent/carer, child, setting SENCo, key person, and advising agencies e.g. Qualified Teacher of the Visually Impaired (QTVI).
- Parents/carers participate in the SEND Support, monitoring progress and reviews.
- Half termly (approximately 6 weekly) reviews of child's progress to inform SEND Support.
- Input or attendance made by appropriate external agencies to reviews.

## Visual Impairment Provision

Stage One	Stage Two
<p><b>Quality learning experiences</b></p> <ul style="list-style-type: none"> <li>• Grouping strategies used flexibly to enhance learning and access to the daily activities and to focus available adult support where needed.</li> <li>• Additional adult support and/or attention for group activities where relevant.</li> <li>• Appropriate position considered for each activity.</li> </ul> <p><b>Additional human and other resources</b></p> <ul style="list-style-type: none"> <li>• Additional adult attention and/or support for some activities, from practitioners already working in the setting.</li> <li>• Supervision and monitoring of SEND Support by SENCo.</li> <li>• Support for some activities, including outcomes identified, from practitioners already working in the setting, to ensure access and encourage independence.</li> <li>• Use of standard and some modified materials.</li> <li>• Modification to the visual environment, e.g. lighting, contrast.</li> </ul>	<p><b>Quality learning experiences</b></p> <ul style="list-style-type: none"> <li>• Grouping strategies used flexibly to enhance learning and access to the daily activities and to focus available adult support where needed.</li> <li>• Additional adult attention and/or support for group activities.</li> <li>• Access to individually supported activities. This may involve working as part of a small group or one-to-one with an adult on planned targets.</li> <li>• Appropriate position considered for each activity.</li> </ul> <p><b>Additional human and other resources</b></p> <ul style="list-style-type: none"> <li>• Additional adult attention and/or support for some activities to achieve outcomes.</li> <li>• Supervision and monitoring of SEND Support by SENCo/ Qualified Teacher for the Visually Impaired (QTVI)</li> <li>• Space for storage facilities for child's specific equipment.</li> <li>• Regular staff support and/or specialist teaching needed.</li> <li>• Access to specialist VI equipment and resources, as appropriate.</li> <li>• Suitable lighting and seating.</li> </ul>

## Visual Impairment Provision

### Stage One

#### Early Years Foundation Stage – supporting development and learning

- Approaches used show acceptance and empathy for the child, support for their emotions, and aims to build positive relationship with them.
- Emphasis on providing and enabling environment both inside and outside, with increased differentiation of access to play and learning activities and materials, to reflect child's visual needs.
- Limited modifications to and differentiation of the setting to ensure access.

#### Training and advice

- Staff training needs are addressed by Qualified Teacher for the Visually Impaired (QTVI) and information is passed to other staff and parents as appropriate. This will help to inform planning.
- Liaison with other agencies as appropriate.

### Stage Two

#### Early Years Foundation Stage – supporting development and learning

- Approaches used show acceptance and empathy for the child, support for their emotions, and aims to build positive relationship with them.
- Emphasis on providing and enabling environment both inside and outside, with increased differentiation of access to play and learning materials, to reflect child's visual needs.
- Increased focus on specific activities and/or use of resources, including ICT and specialist equipment/materials/communication techniques, as identified by QTVI.
- The child may need individual materials to ensure appropriate access.

#### Training and advice

- Support and advice concerning the educational impact of the child's visual impairment for staff from a Qualified Teacher for the Visually Impaired (QTVI) This informs planning.
- Staff attend training and disseminate information to appropriate members of staff.
- Advice sought on an ongoing basis from a Qualified Teacher for the Visually Impaired (QTVI)
- Ongoing parental involvement and support.
- Practitioners knowledgeable about voluntary agencies/support groups who can give advice/support to parents/carers.

**Visual Impairment**
